Re: Changes in sales invoice

Details

People who use ERPNext, swear by it. No fancy sales people, no glitzy presentations, but finally a software for SMBs that just works at prices that you can afford. Sample what our users are saying, "ERPNext has many innovative features that many more expensive ERP systems do not have. If companies that use SAP or Oracle had the usability of ERPNext, their users would have thought they had died and gone to heaven."

* Rushabh created this invoice - 5 days ago
