

Business software  
for the connected era

ERPNext helps you manage operations, improve collaboration,  
get insights and grow your company

Feature rich, easy to use

ERPNext seamlessly integrates procurement,  
inventory, manufacturing, sales, finance, payroll,  
customer relations and project management. Our  
users find it easy to use and capable of handling  
complex business scenarios.

It has industry-specific features for:

- [Manufacturing](#)
- [Distribution](#)
- [Retail](#)
- [Services](#)
- [Education](#)

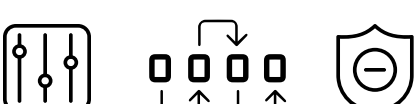

Works anytime, anywhere

Showcase your products, create invoices, check  
inventory levels, view complex reports, reply to your  
customers, and keep an eye on your daily operations  
from anywhere and any device with a recent browser.  
ERPNext enables you to make timely decisions,  
improve customer response times and manage your  
company even while you are away.

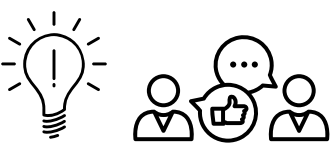

Fast, Reliable, Secure

Our users feel ERPNext is snappy, consistent and  
predictable to use. It prevents human errors and  
preserves data integrity. Every day, your data is  
backed up and available for you to download. It is also  
duplicated in real-time, so if something goes wrong,  
you face minimal disruption. Our servers are secured  
with a firewall and periodically updated to protect  
against recently disclosed security vulnerabilities. You  
are in good hands.

Make it your own

Every business has unique requirements, follow  
different conventions and have users from diverse  
backgrounds. In ERPNext, you can add custom fields,  
design how your prints look, limit data access for  
different users, create custom reports, define email  
alerts and specify workflow rules, all by yourself. With  
the data import tool, you can move your existing data  
and start using it right away.

We listen

ERPNext has been built on inputs from real  
businesses, by a small team of passionate individuals.  
Based on user feedback, we add new features every  
few months and frequently release bug-fixes. Our  
community of over 4000 users actively use ERPNext,  
discuss ideas, report problems and often contribute  
code. We even host an annual conference to meet our  
users and learn their story. With ERPNext, you not  
only get a dependable business software, you also  
earn a place in this growing community.
